

midterm Paper

Now that you have written a solid proposal, we will translate that into a well formed paper. This paper will have few requirements such as:

1. IEEE format
2. All resources used for the paper must be outlined in your proposal
3. You must use the things we have learned in class to assist in describing the research you found

The paper is to be typed, and please try your best with grammar and verbiage. I will grade the paper on a number of categories:

1. Represent the research you found (do not try to inject your opinion)
2. Back yourself up with MATH!!!!
3. Break down your topic as if a 5th grader were reading it.

I will do my best to grade this “nicely” so do not stress to much. You will have 2 weeks to complete your paper.
