17/08/2025

Course information

Course schedule	T/TH	2 - 3:50
Office Hours	T/TH	10:30 - 11:30

Course description

This course introduces students to the fundamental concepts of programming. Students will learn about the software development life-cycle, algorithms, and the design, implementation, and testing of programs using an object-oriented programming language. (C-ID COMP 112).

Course Materials

Python docs
Python crash course

Course requirements

- Homework: descriptions on canvas
- Lab work: activities or discussions given during lab
- Examination: Papers, projects, or tests, Usually a midterm and a final.

Grades

Numbers given below are percentages.

- A: 90-100
- B: 80-90
- C: 70-80
- D: 60-70
- F: 0-60

Grade Weights

0.1 Homework

Homework counts for %40 of your grade.

0.2 Lab Work

Lab work counts for %30 of your grade.

0.3 Examinations

Examinations count for %30 of your grade.

0.4 Extra credit

Extra credit is given at the discretion of the instructor.

Correspondence with the Instructor

Email me during business hours and I will attempt to get back in a timely manner. I recommend talking to me in class.

Late work

No

Attendance

Attendance will be taken every class. Anyone missing four (4) classes or two (2) Coding Assignments in a row will be dropped from the class unless they contact the instructor. Please note it is the student's responsibility to contact the instructor.

Canvas

We will be using Canvas to handle the submitting of homework, and lab work, as well as course correspondence. Please make sure you check Canvas daily for any course changes.

Disclaimer

From time to time this syllabus statement may need to be amended. Students will be notified of syllabus changes during a regularly scheduled class. It will be the responsibility of the students to ensure they possess the latest version of the class syllabus.

Honesty and Integrity

All of the work you do in this course must be your own, unless otherwise directed by the instructor (for example group activities). Cheating or plagiarism on any assignment will result in an automatic zero for that assignment and may result in further disciplinary action. Sharing of assignment code is considered cheating. Using Generative AI to write your code for you is considered cheating.

Other Important Information
